Lowbed Trailers

Low bed trailers are specifically designed to transport heavy cargo such as earth moving equipment, heavy machinery, military hardware, tankers, generators and other over size cargo. Whilst lashing hooks and pulley wheels are standard fittings in low bed trailers, side extensions could be provided as per customer requirements. Rear loading ramps which operate manually or hydraulically are also available on requirement. Customized low bed trailers with "detachable goose neck" for front loading is also within our range. Most Low bed trailers are manufactured as per customer requirements where length, width and height can be customized.

Car Carrier Trailers

Designed to transport light vehicles such as cars, vans, double cabs and jeeps. The Car Carrier Trailers comes with a comprehensive range of features. The number of decks, dimensions and the designing of the trailer could be done as per customer specifications.

Extendable Trailers

Extendable Trailers gives you that much needed 'extra length' which comes in handy when transporting cargo such as long concrete poles/rods, iron bars and other heavy material which are substantially long. Skeletal trailers, Flatbed trailers and even Low bed trailers could be designed and manufactured as Extendable trailers.

Detachable Lowbed Trailers

Detachable low-bed trailers or drop bed trailers as they are commonly known are ideal for front loading of heavy cargo such as earth moving and military cargo. Front loading is considered to be a safe and convenient method of handling and transporting heavy cargo.
